EXPERIENCE

Software Development Engineer in Test - Solera Holdings, LLC - April 2026 - Present

- Playwright / Selenium, SpecGen, GitHub Actions, UI & API Testing

- Performed manual testing of bugs and new features, identifying defects and verifying fixes across the application.

- Contributed to the migration of an automation suite from Selenium to Playwright.

- Automated test cases with SpecGen and ran them through GitHub Actions pipelines.

- Executed regression testing ahead of new releases to validate stability and quality.

- Validated functionality at both the UI level and the API level through direct API calls.

Software Developer - Ordio GmbH, Cologne (Germany) - March 2025 - September 2025

- PHP, Symfony / React, Typescript / React Native

- Gained experience working directly on an all-in-one product for companies and employees, contracted by more than 2,000 companies and used by more than 50,000 people daily.

- Worked on both backend and frontend tasks for the web app, gaining full development lifecycle experience. Implemented new features for the final product, both based on existing features and starting from scratch.

- Focus on real time data fetching for both employees shifts' tasks and companies' events.

- Implementation of features based on complex salary calculations using different metrics, customised for the company's sector and country.

- Worked on special and urgent solutions for specific clients.

- Continuous deployment processes with Terraform.

EDUCATION

Bachelor Degree in Computer Science

Canterbury Christ Church University, Online Studying (Last year)

- Artificial Intelligence, Cybersecurity, Intelligent Cloud and Data, Advanced Operating Systems

Higher Certificate in Science in Software Development

Salesianos (2023-2025)

- Java 17 & 21, Spring Boot, Angular, Docker, Microservices, API REST, JPA, JUnit Testing

SUPPLEMENTARY EDUCATION

University Programme in Artificial Intelligence

UNIR (Oct 2024 – Sept 2025)

Intelligent Systems, AI and Knowledge Engineering, Machine Learning and Data Mining

- Python, pandas, Matplotlib, Seaborn, sklearn, NumPy

University Programme in Software Engineering

UNIR (Oct 2024 – Sept 2025)

Software Engineering, Advanced Databases, Advanced Software Engineering

- Relational Databases, Database Indexes, mongoDB

Azure Data Fundamentals

Microsoft Certified (July 2025)

HARD SKILLS

- Java 17&21/Spring Boot, TypeScript/React, PHP/Symfony
- CI/CD practices
- Scrum
- Databases
- Microservices
- API REST
- MVC architecture

SOFT SKILLS

- Commitment
- Communication
- Open to learn
- Creativity
- Perseverance

LANGUAGES

- **Spanish:** Native
- **English:** C1 Pearson International Certificate
- **German:** B1-B2 (Currently Studying)
